

## DEEP UNIVERSAL BASE

### DBS100

The Argus universal deep base range allows for an extra 10mm depth for applications which require fire resistant cables or cables that are less flexible. This base can be used with both the intelligent and conventional Vega automatic detection devices. Its square cable clamps provide a secure and reliable cable termination. Only the bases marked S are supplied with a short clip which will provide continuity during a detector removal. The base layout is designed with multiple mounting positions for use with a variety of industry standard back boxes.

### KEY FEATURES

- Compatible with all Vega conventional devices
- Deep Profile – 27 mm
- Quick cable connectivity

### TECHNICAL SPECIFICATION

Dimensions	110mm x 27 mm
Operating voltage range	10.5 – 30 V DC
Weight	50g
Temperature Range (no icing)	-10°C to +55°C
Max. humidity (non condensing)	95% RH
Cable size	0.5mm – 2.5mm
