

PRODUCT DATASHEET

FI100

CONVENTIONAL REMOTE INDICATOR

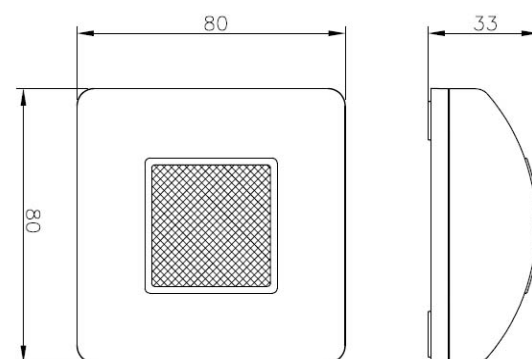

The FI100 is a low profile remote indicator which can be connected to the Argus detector base to provide the remote indicator functionality. The typical application is for outside rooms fitted with fire detection or below loft or void areas fitted AFD devices.

KEY FEATURES

- Low profile design
- Red indicator
- Compatible with the full range of Argus wired fire detectors with remote alarm indicators (conventional and intelligent)
- No programming required

TECHNICAL INFORMATION

TECHNICAL SPECIFICATION

■ Operating voltage	15VDC-40VDC
■ Average current	4.5mA@24VDC
■ Dimensions	80mm x 80mm x 27mm
■ Weight	30g
■ Cable size	0.5-2.5mm ²
■ Operating Temperature (no icing)	-10°C to +55°C
■ Max humidity (non condensing)	95% RH
■ IP Rating	42

STANDARDS & APPROVALS

- BS EN 50130-4:2011 Part 4 Alarm systems - Electromagnetic compatibility
